

SOCIEDAD DE BIOFISICA DE ESPAÑA (SBE)

The SBE

The ***Sociedad de Biofísica De España*** (SBE) aims at promoting and disseminating the interests and activities of Spanish biophysicists at national and international levels. Since its foundation on 1986, the SBE has implemented an active program directed to stimulate the research and training activities in the field of Biophysics. The SBE has facilitated a close contact of its members and has marketed their achievements internationally. For this purpose, the SBE has become a member of IUPAB, EBSA and LAFéBS, and in addition, fosters collaborations with Portuguese Biophysical Society and the Biophysical Society (USA).

OUR OBJECTIVES

1. Monitor the research and training activities in the field of Biophysics in Spain
2. Promote the diffusion of results and technologies from our members
3. Foster Biophysics Research in Spain
4. Recognize and distinguish the achievements of our members
5. Endorse training activities on Biophysics
6. Stimulate a Biophysics career among youngsters
7. Disseminate Biophysics to Society
8. Become a channel of communication between our members and Society
9. Facilitate the transfer and translation of our members technologies to Society

THE MEMBERS

The ***SBE members*** are the essence and pillars of the Society. The SBE was founded by the initiative of a seminal group of Spanish Biophysicists with the aim of creating a warm environment where they could readily interact with colleagues. A particular attention was paid on scientists early on their careers. Accordingly, the Society has two membership categories, ***Regular*** and ***Student*** memberships. The annual fees have been kept low to facilitate the enrollment of scientist, specially students, as the SBE believes they are the future and require mentoring for a successful career. Becoming a member of the SBE has plenty of benefits as detailed next, and all for a very modest fee.

BENEFITS FOR SBE MEMBERS

Common Benefits

- Reduced registration fee at the Annual SBE Congresses
- Reduced registration fee at International Congresses organized by IUPAB, EBSA, LAFebS
- Reception of Digital SBE Magazine & Newsletter, [Biofísica](#)
- Access to SBE directory
- Highlight of work published by members (*Paper of the Month*) on the SBE webpage and online Magazine

Specific Benefits

Student (<i>Adherido</i>)	Regular (<i>Ordinario</i>)
– Eligible for SBE registration and travel fellowships to attend the Annual Congress	– Eligible for for the three prestigious SBE Annual Awards at different career stages (SBE-33, SBE-40-“Enrique Pérez-Payá” and Bruker Prize)
– Eligible for for travel Awards to IUPAB, EBSA and LAFebS Meetings	– Eligible for SBE funds to support meetings which organized by SBE members
– Information on job openings posted by SBE regular members and sponsors	– Eligible for oral presentation at the Annual SBE Congress
– Eligible to post a resume free-of-charge on the SBE online job board	– Eligible for symposium organization at the Annual SBE Congress
– Priority in the registration of Masters, Workshops and Meetings sponsored by the SBE	– Eligible for SBE endorsement for oral contributions at EBSA, IUPAB, and LAFebS meetings
– Eligible to contribute to Biofísica	– Eligible for SBE endorsement for EBSA Awards
– Eligible for Awards in SBE Annual Congress	– Free-of-charge advertisement of job offers in the SBE online job board
	– Reduced fee for advertisements in Biofísica
	– Assistance in transfer technology activities (patent application, spin-off, licensing, etc)
	– Eligible to organize / participate in activities of the SBE Dissemination program
	– Eligible to contribute to Biofísica
	– Eligible to be member of the Editorial board of Biofísica
	– Eligible to be a mentor using the on-line Mentoring Board
